THE

EDITORIAL ZONE

Welcome to the first issue of Game Fan Magazine Designed for the enthusiast gamer. You'll find a fresh new format that cuts right through the garb and goes to what we all want, good games, lots of graphics, and reliable information from the U.S. and abroad. Let me explain how things work around here. First of all you'll notice that we liked just about everything we covered. There are two reasons for this. #1: Each review page is done by a game player who prefers that type of game. To get a more objective view you can go to Viewpoint and see what Skid & Brody have to say. #2: If we do preview a game it's just to let you know it's coming and has potential. Any info we get about the game from the maker will be shown here, then hopefully we can review it just before (one to two months) it comes out so you can plan ahead knowing what's good. Also, each game is rated in comparison to others on that system. What we want to do is bring you all the quality that gaming has to offer while benefiting the gaming industry as well.

In the 2nd issue of Game Fan we will be adding our Most Wanted/Top Ten category. As a subscriber, by writing in with your current favorite and most wanted choices you will earn points. Once you reach a certain goal you will receive FREE game related merchandise according to your total. Not only does this get you free stuff, but it lets the makers know what you like and what you would like to see. You really can make a difference ... makes sense doesn't it? In closing I would like to say I hope you like what we've done in this issue. Our next issue will have more new categories and will, of course, be thicker as we add our advertisers and expanded coverage. Also, since we are a new magazine, we'll be going back to give you our opinions on some recent games that got unfair reviews elsewhere (somebody gave Alisia Dagoon a 4 and set me off). Feel free to write us with all your questions and opinions. This is your forum so feel free to use it. Remember, we're all gamers too ... we listen. See ya next month!

GREENDOG SEGA ACTION AVAIL. NOW SEE REVIEW PG. 10 BY E. STORM

Greendog was fun enough to hold my interest all the way through. It has nice scrolling backgrounds and good diversity. There's just not enough here to make it a big game, but it's got enough good points to make it a worthy title.

Greendog could have been a really great side scrolling action game but falls short in the graphics and sound categories. A surfer as a lead character is a great idea, but I feel the end result is average at best.

GODS MINDSCAPE ACTION AVAIL. NOV. SEE REVIEW PG. 11 BY E. STORM

Gods combines a great challenge with excellent graphics and sound. Both the characters and the enemies animate smoothly and are highly detailed. Although Gods is a bit difficult, it is definitely worth the time to finish ... recommended!

Gods is a great translation from the PC original. Although some might find this game a little difficult, it's worth getting it wired just to check out the awesome bosses. Playability is just right and both the graphics and music are top notch. Definitely check it out.

WONDERDOG JVC/CORE ACTION CD AVAIL. NOV. SEE REVIEW PG. 12 BY E. STORM

Core has done it again! Wonderdog has everything I look for in an action game: Great graphics and animation, scaling and rotation, great music, and most of all Wonderdog is a long game with just the right amount of difficulty ... bring on part 2!

Sega/Mega-CD owners will be in heaven when Wonderdog shows up! This game is a must have and a good reason to buy a CD ROM. It's got awesome music and graphics from beginning to end, and some really kooky characters. I was up all night! Homer will be proud.

THUNDERSTORM FX RENO SHOOTER CD AVAIL. NOV. SEE REVIEW PG. 16 BY E. STORM

A must have for Sega-CD owners! Though it is the first in the LD to CD line-up, Thunderstorm loses little in the translation. It's like a rollercoaster ride! I guarantee you'll play over and over again. Oh yea ... to get the surround sound, use headphones ... a BIG winner!

Being a serious fan of the coin-op, I wasn't sure Wolfteam could pull it off. I sure am glad I was wrong! This is a near perfect translation from the arcade. Big time sweaty palms on this one! Be sure not to miss it.

THUNDERFORCE IV TECNO SOFT SHOOTER AVAIL. NOW (JAPAN) SEE REVIEW PG. 18 BY E. STORM

The king of shooters for Sega! Thunderforce IV is incredible, loads of scrolls, four screens high, incredible music for a cartridge game. It's pure adrenaline! The only way to beat this is on CD, and guess what they're doing at Tecno Soft ...

This is the ultimate in shooters! I've never played a shooter on the Genesis that even comes close to this. You'll be amazed at everything, and the music kicks butt. Go see a doctor if you pass on this one.

ALIEN ARENA ACTION AVAIL. NOW SEE REVIEW PG. 20 BY E. STORM

Alien 3 is one of the best Genesis games I've ever played. Not only are the graphics excellent, but the music and sampled sounds are third generation all the way. I just wish they'd give you a little more time! Everything about Alien 3 is first class primo good stuff!

I haven't had this much fun being frustrated in a long time. This game requires good reflexes, a sharp memory, and a cast iron stomach, cause if you can't rescue the hostages in time, they get chunked! Definitely a great action game you'll go back to over and over.

GLOBAL GLADIATORS VIRGIN ACTION AVAIL. OCT. SEE PAGE 22 BY E. STORM

Way to go Virgin! Where have you guys been? With games like this, Sega could be #1! Global Gladiators is the best platform action game I've played since Sonic, with eye-popping graphics and some great music. 3rd generation all the way!

Score one for the Genesis! This game is a masterpiece and deserves a special spot in your Sega game library. Virgin takes a great idea and makes it happen. Don't miss it.

MAGICAL TROLL SEGA OF JAPAN ACTION AVAIL. NOW JAPAN SEE REVIEW PG. 24 BY E. STORM

A great off beat action game with all the colors and playability you could ever ask for. It might be hard to track one down, since it's still on the Top 5 in Japan, but it's worth the effort all the way.

This game may never appear in the U.S. and that's a shame. Anyone who likes Sonic/Mario type platform action games will love this game. It rates up there with the best of the big ones. Way cool characters and the biggest boss yet ... good stuff!

SUPER HIGH IMPACT ARENA SPORTS AVAIL. NOW SEE REVIEW PG. 26 BY TALKO

I'm not big on sports games but I really liked High Impact. It's got easy controls, great voice, and no "ice skating" characters. This is as much an action game as it is a sports game. Those Iguanas really know what they're doing.

Taken straight from the coin op, this title has all the arcade action gamers need. Great digitized graphics and hilarious voice combined with good control make this game too good not to get.

BIO HAZARD BATTLE SEGA SHOOTER AVAIL. NOV. SEE REVIEW PG. 26 BY E. STORM

Another great Sega shooter. Okay, so you say you're tired of shooters. Take my word for it, Bio Hazard is worth checking out, I guarantee there's stuff here you've never seen before. Third generation all the way!

This is an amazing shooter like I've never seen before! Bio Hazard is a really unique game with incredible graphics and game play. Some of the enemies look like they're done in claymation. You can tell this is quality all the way. My only complaint is that it might be a little too difficult.

PREDATOR 2 ARENA ACTION/STR. AVAIL. NOW SEE REVIEW PG. 27 BY E. STORM

P2 is put together well. Though not spectacular, it's fun to play and has some nice graphics (like the exploding hostages), but could've been a little bit longer. Not a blockbuster but a worthy addition to your collection.

Take Smash TV and give yourself the freedom to move around and you've got Predator 2. While not a bad game, I just found it to be a little too average from beginning to end. The best part was watching the hostages get toasted!

SPIDERMAN/X-MEN ACCLAIM ACTION AVAIL. OCT. SEE REVIEW PG. 28 BY BUD D.

I really like the way X-Men is laid out. The characters are small and well animated making the levels seem huge and cavernous, and the game play is right on. I also like controlling four different characters in one game. Another excellent SNES game with outstanding music.

X-Men is a totally awesome action game. This title has everything you could ask for: Great music, incredible playability, and the chance to play your favorite super heroes. Another great SNES game from Acclaim.

BUSTER BROS. CAPCOM ACTION/STR. AVAIL. NOW SEE REVIEW PG. 29 BY G. MAC

How long can you run around popping bubbles, and how fun can that be? Even though the graphic is Capcom quality, I couldn't get into this one. But if this is your kind of game, I'm sure it's the best one. After all ... it is Capcom.

This game has been successfully ported straight from the arcade. Although I usually find that this type of game is not my style, I have to admit, it quickly becomes addicting. My only complaint is that it should have been two player. Come on Capcom, you can do it!

PARODIUS KONAMI SHOOTER AVAIL. NOW JAPAN SEE REVIEW PG. 29 BY BUD D.

I'm sorry, I just don't like cute games. I know, I know, this is a great Konami shooter with great color and lots of bosses, but man is it cute ... I'll pass.

No need to apologize, even though you're wrong. This game's another masterpiece from Konami, they can't go wrong! While some might think this game is too cute, I loved it! A perfect shooter all the way!

SUPER STAR WARS JVC ACTION AVAIL. DEC. SEE REVIEW PG. 30 BY E. STORM

Star Wars totally lived up to my high expectations. That SNES sound really comes through here! Star Wars is awesome all the way through. I put it in the top 10 SNES action game category! Will the Empire Strike Back? ...

What a completely awesome game! JVC/Lucas Arts sure know how to program. This game lives up to its expectations all the way. Just wait till you see the incredible mode 7 scenes, they'll make you dizzy. And, you'll be blown away by the music. Super Star Wars is awesome.

PRINCE OF PERSIA KONAMI ACTION AVAIL. OCT. SEE REVIEW PG. 32 BY BUD D.

All right! A unique game! Konami took a tired game and woke it up ... big time! Even if you've played it before, get this one. Prince of Persia mixes great animation with superb game play and incredible music. After playing this one, I hope they make a sequel.

OK, Prince of Persia on the SNES, you might think "seen it, done it", NOT! This game is all new and unique! Even if you've played every version imaginable, you'll find this one the best so far. Incredible animation and a great sound track add to the enjoyment of this game. A must have!

HARLEY'S HUMONGOUS ADV. EA ACTION AVAIL. NOV. SEE REVIEW PG. 34 BY K. FAUSTO

Harley's is a fun game with great diversity, but what makes it really stand out are the claymation effects, especially on the Big Rat boss. Harley's is a good challenge and it's plenty long. More scrolls and backgrounds would put it in the '90's.

What a great idea for what would have been just another standard action game. I like the thought of being shrunk down and set free in a house gone wrong. This game could use a little more detail in the backgrounds, but makes up for it in the character detail. Check it out!

NEUTOPA II HUDSON ACTION/RPG AVAIL. NOW SEE REVIEW PG. 43 BY K. FAUSTO

Following in the steps of part one, this 6 meg version of Neutopia has all the same ingredients, with better graphics, music, and a longer quest. If you liked part 1, you'll love part 2. I'd love to see a version on CD ... Neutopia 3?

I found Neutopia 2 to be a very addicting action/RPG. Even though graphically not up to par with the SNES or Genesis, this game is laid out extremely well. In fact I liked it so much I'm going to go out and get part 1 ... Well done!

PHALANX KEMCO SHOOTER AVAIL. OCT. SEE REVIEW PG. 35 BY E. STORM

At first glance, you may think this is your average shooter, but play a few levels and you'll think again. This game saves the best for last and gets progressively harder as you go along. Just wait till you see the last level! Phalanx is a winner.

Obviously many have judged this game without beating it. Remember the rotating tunnel in Castlevania? ... It's here! (at the end). Phalanx is a great shooter, probably too hard for most, but hey, there's always slow motion. Grab an ASCII Pad check out Phalanx!

DEAD MOON NATSUME SHOOTER AVAIL. OCT. SEE REVIEW PG. 43 BY BUD D.

Way to go Natsume! This is what Turbo games should look like, great scrolling backgrounds, a wide assortment of power-ups and great end bosses ... and the ship does a 360 ... I like it!

I'll say one thing. A year ago you would have never expected to see this many scrolls on a Turbo game. This is an above average shooter with some extra features such as multiple power-ups and the ability to turn around when you reach a boss. A good addition to the Turbo library.

KING OF THE MONSTERS TAKARA WRESTLING AVAIL. NOW JAPAN SEE REVIEW PG. 35 BY BUD D.

It's great that SNES owners can play 'Geo games and King of the Monsters plays okay on the SNES, but it's not the Neo-Geo. Maybe they should have called it King of the Monsters Jr.

Well, it's hard to rate this game fairly when it has to live up to its Neo-Geo counterpart, but on its own, KOM is a great attempt with almost all of the action intact. Its only downfall is that it might be too short and does get a bit repetitive. A solid game at any rate.

GATE OF THUNDER TTI SHOOTER AVAIL. OCT. SEE REVIEW PG. 44 BY BUD D.

GOT opens with a great Super CD intro and turns into a great Super CD shooter! The music is hard'n'gnarly and the game play is fast. I especially appreciate the sampled explosions instead of the usual 8-bit crackles. The only weak point is the lack of unique environments.

Now this is my kind of shooter! GOT has it all, packed on to one Super CD. Right from the start you can see the quality of this game. With a totally cool intro plus some truly great head-banging music. All the explosions are sampled and the action is intense.

SUPER DOUBLE DRAGON TRADEWEST FIGHTING AVAIL. NOW SEE REVIEW PG. 36 BY E. STORM

If you like fighting games than this is your game! Double Dragon is definitely the best fighting game for the SNES. With more moves (lots more), great colors, and SNES sound, Double Dragon gets a major 16 bit facelift.

This is an incredible fighting game that lives up to Streets of Rage fame. The amount of details and moves in this game are seriously outstanding. Throw in a two player option plus 16 bit versions of Double Dragon tunes and you've got an awesome game.

PRINCE OF PERSIA HUDSON ACTION AVAIL. OCT. SEE REVIEW PG. 44 BY BUD D.

I've played Prince of Persia on just about every system and this version comes in number 2 right behind the Super Famicom, thanks to the smooth animation and CD sound. But honestly, I think it's time somebody did a sequel.

Yet another version, this time on Super CD. While not a bad game at all, I was expecting a little more, especially in the sound category. Good animation and challenge make it above average and a nice action title for the Turbo Duo CD ROM.

OUT OF THIS WORLD INTERPLAY ACTION AVAIL. NOV. SEE REVIEW PG. 37 BY BIG J

Another unique new game comes to the SNES translated perfectly from the PC. OOTW is the thinking man's action game. With smooth polygons and mesmerizing music OOTW is sure to be a classic.

This game takes a new and unique concept and makes it work! Play an interactive movie where you're in control. OOTW packs some awesome polygon animation plus an incredible soundtrack. Like the title says...

ATOMIC ROBO KID UPL SHOOTER AVAIL. NOW JAPAN SEE REVIEW PG. 45 BY E. STORM

UPL did Atomic Robo Kid complete justice on the PC Engine. Robo Kid has great playability and graphics along with some of the best color ever on a PC Engine game. My all time favorite PC shooter!

This little known classic arcade title has gone over really well on the PC Engine and is a favorite among the staff at GameFan. A great shooter with a really cool character. Robo Kid has enough appeal to make it stand out from the rest.

SOUL BLAZER ENIX ACTION/RPG AVAIL. OCT. SEE REVIEW PG. 37 BY MORREY

Take the music and graphic excellence of Actraiser and throw it into an action/RPG and you've got magic. Soul Blazer is a must, whether you're into RPG's or not... Rivaling even the mighty Link. (Isn't it time for Actraiser 2?)

Soul Blazer is another Enix masterpiece! This is a great way to follow Actraiser, with a near perfect action/RPG that you won't want to stop playing from start to finish. Even though I'm not into RPG's, this one held my interest. It has enough to offer for even the most hardcore action players.

NINJA GAIDEN HUDSON ACTION AVAIL. NOW JAPAN SEE REVIEW PG. 45 BY E. STORM

Ninja Gaiden comes to the PC! Same as the 8-bit but with more colors and detail. It feels and plays just like the old 8-bit NES version. I liked that one and I like this one even better... good stuff!

It's about time someone did an upgrade of this great NES title and Ninja Gaiden comes off well. There's loads of colors and detail plus all the intermissions. A must for all you ninja gamers!

LAST FIGHTER TWIN BANPRESTO FIGHTING AVAIL. NOW JAPAN SEE REVIEW PG. 38 BY E. STORM

Last Fighter Twin may not be for everyone but I've got a soft spot for Gundams. Last Fighter Twin is a unique fighting game with the addition of the Gundams and their magical powers. The backgrounds in this game are excellent as are the graphics and playability ... I like it!

Anyone who's familiar with the Gundam characters will be stoked when they get their hands on Last Fighter Twin. Take control of cool little robots and kick some serious metal in this two player Final Fight-style game. Banpresto has a great game and should consider a U.S. release.

NEW ADVENTURE ISLAND HUDSON ACTION AVAIL. NOW SEE REVIEW PG. 46 BY G. MAC

Adventure Island is a well rounded action title. Though not graphically spectacular the playability is great and the game offers a worthy challenge. You'll soon find yourself playing over and over. The game play is very addicting. Adventure Island offers some good clean fun.

Adventure Island is your typical run & jump action type game. While I can't really bag on this title, I found it pretty much average all around. It's nice to see on the Turbo, but I'd like to see a little more originality ... so-so.

RANMA 1/2 NCS FIGHTING AVAIL. NOW JAPAN SEE REVIEW PG. 41 BY F. MASTER

Ranma 1/2 is a great fighting game in the SF2 tradition with great control and all the signature moves (and then some). But I said it once, and I'll say it again, I don't like cute games. In a fighting game I wanna hammer some goon, not twirl my ribbons.

This is as close as you can get to SF2 on the SNES/SFC. Ranma 1/2 has everything to offer to 1 on 1 fighting fans. There's ten characters to choose from, each with their own special moves, plus a special option that lets you play char. vs. char. Another great game from NCS.

BASEBALL STARS 2 SNK SPORTS AVAIL. NOW SEE REVIEW PG. 49 BY TALKO

Baseball Stars 2 is far and away the best sports game I have ever played. This is where the Neo-Geo Shines. This game absolutely leaps off the screen ... brilliant!

This game is pure baseball excellence. I can't find one thing wrong with it. The graphics are incredibly well detailed with humongous players and the game play is unparalleled. Baseball Stars 2 is a major improvement over the first. All in all ... the best!

SHAPESHIFTER TTI ACTION/ADV. AVAIL. OCT. SEE REVIEW PG. 42 BY E. STORM

Shapeshifter is a respectable first action game for the Super CD. Although it's a good game, I know the system is capable of so much more, but hey, after such a long dry spell it's nice to see anything! Bring me more!

I'm one of those people that held on to my Turbo CD, and it's nice to see that it was worth it, not that Shapeshifter is a great game, but it held my interest. I especially liked the scrolls and the diversity of characters. Now that I've dusted off my system, keep 'em coming!

WORLD HEROES ALPHA-DENSHI FIGHTING AVAIL. OCT. SEE REVIEW PG. 47 BY BUD D.

What I like about World Heroes is that it is NOT just another Street Fighter 2 clone. The moves and characters are all new and unique and I like the weapons and added Death Match. More awesome stuff for the Geo! ... Where's my RPG!?!?

Alpha's attempt at a 1 on 1 fighting game is a success! I found this game to have all the ingredients necessary to make a great fighting game, rivaled by Street Fighter 2 and surpassed only by Art of Fighting. A must-have for Geo owners.

AN INTERVIEW WITH YUZO KOSHIRO

Yuzo Koshiro is the foremost game musician in Japan. Yuzo is responsible for such master works as Y's I & II, Actraiser, Revenge of Shinobi and

Streets of Rage. Recently Yuzo was in California working on the music for Batman Returns for Sega. After a quick phone call we grabbed our tape recorder and jetted over to meet Yuzo at his hotel for a candid interview. Yuzo Koshiro, to our surprise, is only 23 years old. He is energetic and personable. We found Yuzo open and easy to talk to (with the aid of our ace international correspondent, Kei Kuboki). Here's what he had to say.

DHNN: When were you born?

YUZO: December 20, 1967, I am a Capricorn.

DHNN: What is your musical background?

YUZO: I started playing piano when I was 3 years old, I started playing the violin at 5, and began playing the cello in junior high. I've been composing music since the first grade, just basic stuff though. I didn't get involved in musical activities at school but I was playing keyboards in a band in junior high.

DHNN: What kind of music did you play?

YUZO: It was punk and heavy metal like the Sex Pistols (laughs).

DHNN: How did you get involved in game music?

YUZO: Just out of high school I was reading a computer magazine (Login), and I found an ad for a musician from the company Falcom. So I sent them a demo tape, and they immediately hired me. That's how it all started.

DHNN: So what was the first game you ever composed the music for?

YUZO: It was for personal computers, a game called Xanadu.

DHNN: Oh, yeah? Any other ones we don't know about?

YUZO: I also did the music for Y's I & II.

DHNN: No wonder the music was so incredible!

YUZO: Thank you.

DHNN: Besides Streets of Rage, Actraiser, and

Adventure Island what music have you done?

YUZO: I did Revenge of Shinobi on Mega Drive and also Sonic and Shinobi on Game Gear.

DHNN: Sonic 2 is coming out soon, are you doing the music for that as well?

YUZO: No, not for part 2.

DHNN: How about Land Stalker?

YUZO: No, but that game looks incredible.

DHNN: So what else have you done?

YUZO: That's about it for home systems.

DHNN: What steps do you take to make game music?

YUZO: First of all, when you're composing game music, you have to have the game on the screen. I usually get EPROMS or samples of the game so that I can experience the feelings of the game. Then my imagination goes to work. By moving the characters I determine what kind of beat is suitable.

DHNN: What kind of equipment do you use?

YUZO: I use a synthesizer, a drum machine and a sequencer. I compose the music and enter it into a normal computer. I then attach the computer to two sound boards and edit the music then play it through the computer and transfer it into the Mega Drive or Super Famicom.

DHNN: Okay, enough technical stuff, Yuzo, what kind of games do you like?

YUZO: Street Fighter 2, definitely!

DHNN: What kind of music do you like to listen to?

YUZO: New Wave, Dance Music, Techno Pop, Classical, and Hard Rock.

DHNN: So you like just about everything?

YUZO: That's right!

DHNN: Is there any music that you like from the U.S.?

YUZO: Van Halen! I saw them live in Japan, and also Soul to Soul, those are my favorites.

DHNN: How do you get the Mega Drive to sound so much better than anyone else? Is there some special secret?

YUZO: It's my technique, but you have to have the feel for it too. I don't think other people are doing it the same way that I do. I try to get the best sound by hooking the system up to speakers so I can really hear the highs and lows.

DHNN: So what about the game music CD's?

YUZO: Those are directly from the game. The live

recordings are done by the Sonic Band.

DHNN: What do you feel is your best work so far?

YUZO: Hmmmm ... A couple of years back I did Sorcerian. I liked that a lot. I also liked Bare Knuckles and Actraiser.

DHNN: Do you mean the Sorcerian that came out for the Mega Drive and Super CD?

YUZO: No, I worked on the computer version, but I'm pretty sure the Super CD version has my music.

DHNN: Do you ever refuse to do music for a game?

YUZO: Yes, if it's a bad game I won't do it.

DHNN: What are you working on right now?

YUZO: Batman Returns for the Genesis and Sega-CD, Streets of Rage 2, and there's a Nintendo game I can't mention.

DHNN: Anything for Mega-CD?

YUZO: Yeah, there is one called Eye of the Beholder.

DHNN: How do you feel about CD? Will it allow you more creative freedom?

YUZO: CD will allow me more freedom to express myself.

DHNN: Any chance that your CD's will be released in the U.S.?

YUZO: I would love it, but there are no plans right now.

DHNN: Are you doing the music for Revenge of Shinobi 2 or Ninja Gaiden for the Mega Drive?

YUZO: I'm not sure yet. What made you think to interview me for your magazine?

DHNN: Since we're going to be the number one magazine, and this is issue number one, we have to have the number one game musician. Don't you realize that you're very famous in the U.S.?

YUZO: Am I?

DHNN: Yes, a lot of our readers love your music.

YUZO: I'm really glad to hear that.

DHNN: Thank you very much for your time. We're looking forward to hearing more of your work in the future.

YUZO: Thank you.

Streets of Rage (Genesis/ Mega Drive)

At the title screen, set the cursor on option. Press 'Start' on controller 1 while holding down buttons 'A', 'B', 'C', & 'R' on the second controller. This will give you a stage select and also allows you to set the number of lives in this game.

Magical Troll (Mega Drive)

Plug in two controllers and when the Sega logo appears, on the second controller press buttons 'A', 'B', 'C', 'C', 'B', and 'A'. Go to the options screen and you'll now have the ability to select any level you wish to play.

Macross (Turbo Grafx/ Pc Engine)

At the option screen, press in order 'I', 'Right', 'Left', 'II', 'Up', 'Down', 'II', 'I', 'II', 'I'. You can now choose from unlimited lives or invincibility.

Gate of Thunder (Turbo Grafx/ Pc Engine)

At the title screen, press 'Select' then 'I', 'II', 'II', 'I', 'Select', 'I', 'II', 'I', 'II', 'Select', 'Run'. This will give you a stage select.

Ranma 1/2 (Super Famicom/ Super Nintendo)

Set the cursor on .vs mode at the title screen. While holding 'L' & 'R' buttons, press 'Start'. This gives you a configuration mode which allows you to choose two extra characters not in the normal game plus you can play same character .vs character. Also by pressing the 'Select' button you can choose from the different backgrounds.

Prince of Persia (Super Famicom/ Super Nintendo)

Go to the password screen and type in 'SPECIAL', then choose 'OK'. You should hear a grunting sound. Start the game, then pause. At this point press 'B', 'Y', 'Up', 'Down', 'Left', 'Right', 'L', then 'R'. Un-pause the game then re-pause the game while holding 'Select'. This gives you a level select, sound test, and unlimited vials

Parodius (Super Famicom/ Super Nintendo)

At the player select screen, put the cursor on 'Big Viper' and hold 'Up', 'L', and 'X' simultaneously for 15 seconds. This gives you invincibility, stage select, and all your weapons.

Teenage Mutant Ninja Turtles 4 (Super Famicom/ Super Nintendo)

At the title screen press 'Up', 'Up', 'Down', 'Down', 'Left', 'Right', 'Left', 'Right', 'B', 'A'. Then go to the option screen you will be able to change number of lives to 10.

As always, SEGA is Making a huge comeback at years end, only this time they've added their incredible CD ROM drive (due out this Nov.). Since most companies are developing on CD for the first time, the first wave of games (as awesome as they are) will only scratch the surface of what this new system is capable of, assuring users a bright future with their new SEGA CD's. Oh Ya! They've got the cartridges fully dialed in ... and Konami's coming!

Don't even try to figure out what the name means (as we spotted no green dogs present). You play a rad surfer dude who's abilities are suddenly taken away when he bails head first and finds an ancient necklace buried in the sand. Now, (according to your girlfriend Bambi) you must piece together the sacred idol to regain your surf skills. Greendog offers a mild but well rounded action romp, as you'll jump, fly, skate, or swim to achieve your goal. The graphics are excellent with loads of scrolls and the game is fun to play. Shortcomings are the lack of bosses and enemy characters (you mainly fight annoying little vermin). Strong points are the graphics, Jamaican tunes, and diversity of play mechanics (I especially enjoyed the skateboard sequences). Overall Greendog is just a fun game, nothing ground breaking, but worth owning, as you will surely play over and over between big titles.

AVAIL. OCT./NOV.

The second you turn on your Genesis, you'll know you've got a winner with GODS, as the graphic presentation and the music are top notch. But, don't expect to fly through this one, oh no! Each level is detailed and complicated, with only one route to escape. You'll encounter hordes of cool mutated beasts and flying freaks as you jump, climb, shoot, and throw switches while looking for the exit. Along the way you'll find keys, storage pots, and formulas (and maybe even a warp or two) to help you along. What I like most about GODS is the challenge. Even the best gamers will find it hard but not impossible, and the game is fun enough and graphically good enough to keep on playing. Another strong point are the bosses. I don't want to give it away, but take my word, they're pretty fierce! So if you own a Genesis... (you do don't you?) seek out and purchase GODS... Then call in sick!

NICE SCALING!

When the first level opens and you see those graphics, the first thing you'll want to do is take off running, flying and shooting ... but hold on! Take your time. Number one, DON'T shoot the rabbits (it really pisses them off!). Don't hurt them and they won't hurt you. If you shoot em' they'll freak and jump at you erratically, so just leave them alone and move on. Your best bet is to walk slowly through the first half of the level and eliminate the moles big dogs and ducks, then you're free to run jump fly and explore. The trees are loaded with bonus-

es and invisible platforms leading to bonus rounds (so look and fly everywhere!). There's a happy face in each level. Once you touch it Wonderdog assumes the Buddha position and magically fills in the invisible platforms leading to higher places and more goodies (yum!). If you're really thorough you'll find the special bonus and warp to the big top (complete with circus tunes), where you must ring all the bells in the allotted time for a 1-up!. There's also a special underground stage (I wonder where it is?). The

middle boss of level one is the scarecrow, he'll take off his head and bounce it at you (it rotates beautifully!). Dodge the head while powering up and flinging your stars (he's pretty easy). The end boss is two floating rats. Without bringing number two onto the screen bank your star off the ground and pop as many balloons on number one as you can (once they're both on-screen things get hectic). Pop all the balloons and you're on your way to level two ...

Dogsville is possibly the best level of a game I have ever seen. First of all the music here is ultra-cool, and scrolls, you want scrolls? There must be ten in the street alone. And if you really look closely a little guy will stick his head out the window to check you out! This is good stuff! There's a cool sequence you can try here ... Grab the tornado at mid-level, spin right up two inclines, then jump left, and you'll hit an invisible platform. Jump left again at the second bone, and there's a group of bones and a happy face. With the happy face filled in, complete the level. Now you can take the high road or the low road. The first boss in Dogsville is a crazy maid, the second is a fat slob with killer smoke rings. Both are fairly easy to defeat but they're so cool to look at, you'll want to drag it out! From here you'll venture onto The Scrapyard, with its old sofas motorcycle rats and broken glass, Loony moon with scaling UFO's, space freaks and smelly cheese, Planet Weird with flying slugs, ghosts, and freaky faces, Foggia, with all kinds of fog spewing creatures, and Planet Kninos with military dogs and hidden secrets, and then of course, your final destination. All the levels in Wonderdog are new and different, each with their own special qualities and play mechanics, all set to some of the coolest music I've ever heard! As far as setting up your controller goes, try this. If you play with your thumb, use A for run, B to jump, and C to shoot. You should have the run and jump buttons side by side, since jumping is so much a part of Wonderdog. On tricky bosses you might want to use a three finger control to run, shoot, and jump simultaneously. This takes some practice but it works great on the balloon rats and the big maid. So there you have it! SEGA CD rom is really what they say! Wonderdog proves that. It just takes time for programmers to learn the development system, and the guys at Core obviously have! Lets hope we see more companies follow with more great action games like Wonderdog while we wait for part two! Thanks for reading...

Three hundred years ago, King Knowl had it all. Known by all for his riches and power, he had built several castles throughout the land to hold these treasures. But his power did not last long. Three leaders stood against him and a war broke out. The rebellion chased him into his last castle where his people, his powerful magician, his treasures, and the King mysteriously vanished. Over the last three hundred years many have tried to unravel the mystery ... none have succeeded. It has become the tabu of all treasure hunters ... until now.

Ryle will now begin his adventure to find the King's treasure. Get ready for a new experience in action RPG's. Through the magic of the DDS system, Land Stalker will give you realism and expression like you've never seen before. The characters are displayed three dimensionally and animate realistically. Experience fifteen levels of height. To move up, you may find yourself jumping out of a window and landing on another character who will then take you to a higher plane. The characters in Predator 2 (though small) are well detailed as are the backgrounds. The action is fast, non-stop shooting as each area is littered with drug toting' bad boys. Power-up weapons are everywhere, including the shotgun, assault rifle, spears, grenades, nets, and flying alien disks. The game play is similar to Smash TV, as you can lock Harrigan into place and move freely. The control is excellent and the music goes well with the game. Every so often the Predator himself will show up to let you know he's watching you, just waiting for you to make one mistake. If he locks on he'll blow you to bits. There's also a password screen after each level and some great digitized graphics. Overall Predator 2 is an excellent action/shooter worthy of a spot in your Genesis collection.

The masters at Virgin have really done it this time! Going where no programmers have gone before, mixing spectacular graphics and animation, great music and voice, and superb playability all into one fast and fun 8 meg cart.

Global Gladiators is definitely a next generation game, if you don't have a Genesis here's another reason to go get one, it's that good! You'll explore four areas with three sections each harder than the last. The first level is a total slime fest. There's all kinds of slimy spewing beasts in your way (wait till you hear 'em). Invisible platforms are everywhere, it's major fun. When your character stands still on an invisible platform (or anywhere for that matter) it's way-cool animation time. Level two (the forest) is a masterpiece in it's own right, with trees four screens high, running waterfalls, cool walking fish, and farting skunks. It's easier to take the tress, but the ground is the manly way. Level three (Toxittown) is another great level complete with trash cans that heave bottles, dancing fireballs, and killer pollution clouds all set on girders and conveyor belts set in a gloomy factory backdrop. Get ready to jump ... a lot. The first thing you'll notice about level four is the music (how did they do that?), but listen too long because there's some fierce polar bears that want you for lunch! This is another gorgeous level, thing is, you ain't got time to look! The action here is fast and non stop!

It takes a true gamer to beat this one, but it's well worth it. I guarantee you'll play Global Gladiators over and over, and that's what it's all about, right?

Seems evil has taken over the local school, and Magical Taluto (a junior magician) is ready to find out how and by who. This is just one story in the long standing cartoon trilogy which has become so popular in Japan. In this unique action platform game, you'll run, jump, fly, and wave your magic wand through fifteen (5 x 3) beautiful sections of game play as you battle strange creatures and try to find your missing friends. Although this is a four meg game, you would never know by playing it (remember Sonic?) as there are tons of colors on screen and lots of special sound and graphic effects usually found only on higher meg carts. But the best thing about Magical Troll is the game play. All the bosses are totally unique, and one especially will blow you away! There is also a lot of jumping and flying which is done just right as you can re-adjust you

character in mid-flight. Another challenge is trying to find all nine of your hidden friends, you don't have to but if you do they all appear at the end of the game! And still two more features are the magic wand and the flight. Whenever you touch an item with your wand it comes alive (complete with blinking eyes and mouth) and becomes throwable. To fly jump with 'C' then press and hold 'C', Taluto can only fly a little since he's just a junior magician but it real-

ly helps in the game. You also earn three types of magic throughout the adventure which I'll let you see for yourself. It's all here! What puzzles me is how a great game like this can slip past un-noticed while we're sitting through those first quarter dry spells. Overall Magical Troll is excellent in every way and I highly recommend it. It's just a great game. Thanks for reading!

Well, Capcom has done it again. The SNES version of this arcade hit is one of those games that I will play for a long time to come. Popping bubbles and avoiding goofy dragons and fire-balls is not easy but great power-ups and ingenuity will help you get through even the stickiest of situations. The most obvious difference between the Coin-op and the

SNES is the lack of 2 player simultaneous play, however this version has got enough extras to make up for it. The sound (I think) is better than the Coin-op, and the gameplay is identical with no slow down at all. For those of you not yet familiar with Buster Brothers the object is simple, pop all of the bubbles without getting hit and collect as many special items as you can along the way. Sound's simple enough eh? Well... the more you play it, the more you want to. I could go on and on but I think I'd rather let you try it and see for yourself. Have fun!

AVAIL. 4th QTR '92

It's the game from the movie ... Star Wars, you know the story, so how is the game? Does it do the blockbuster movie justice? Well, as your reviewer I'm pleased to tell you, yes it does ... Big Time!

From the moment you turn on your system you know this game is something special. As the trademark Star Wars story scales onto the screen, the music is awesome, it's all there!

After a great intro you're ready for the game. The graphics are bright and detailed, the characters animate perfectly, and the music is top notch. In the beginning you can only play Luke. After you

meet

Obi Wan you can choose Han Solo (my personal favorite) and later you can choose Chewbacca. Each character has his own special abilities. I couldn't beat the game with Luke or Chewbacca. Han always seems to start off with a better weapon, so after grabbing only one power-

up he'd be set with homers' for the tough Tie fighters towards the end of the game. The side scroll portions of Star Wars are laid out well with a steady onslaught of enemies, obstacles and a lot of jumping (Precision Jumping). The ability to move the screen up and down make jumping to lower levels a bit easier, but some of the jumps are still pretty gnarly. Star Wars is not a game to rush through, if you take your time you'll live a lot longer.

Enough about the side scrolls, the real fun comes when you pilot the Land Speeder or the X-Wing fighter. In the Land Speeder you pick off Jawas (they scream and fly up into the air) while

collecting jet fuel and avoiding obstacles on your way to your destination. If you pull back and gas it you can fly and spin. It's a great effect. Finally, at the end of your long journey, you get to pilot the X-Wing. I don't want to give it away, but it's ultra fun.

Over all Star Wars is an excellent game in every category totally living up to my expectations. I highly recommend it.

RUN YOU'RE INVINCIBLE

Electronic Arts' first attempt at something other than a sports title on the Super NES is a success!! In this action game you play Harley, a cool but wacky scientist who's into mutating small animals as a leisurely past time. Harley gets a bit over zealous and mistakely shrinks himself. Worse yet

he blows up his shrinking machine in the process and the pieces are now strewn about his abode. Strap on your Jet Pack and arm yourself with whatever comes handy, including marbles, nails, rubber bands, and thumb tacks because Harley's in for the ride of his life!!!

This is a game that has to be played to realize it's full potential. Each enemy character, from bug-eyed beasts to huge rats

and diving killer flies, looks like it's been done in claymation. Jamming through the kitchen, library, bathroom, playroom, etc... as an insect sized mad scientist makes for a fun game. Drive toy tanks, bounce on staplers, spin on soap and float in bubbles. You'll do all kinds of crazy stuff to gather your parts so you can regain full size.

Even though some of the backgrounds bored me a bit, I had a lot of fun playing Harley's. It's not too cute and it's not run-of-the-mill by any means. The first time I got to the huge wart-nosed boss rat I had to pause the game just to check him out ... I was way dazzled by the claymation effect. Harley's is definitely a cool game well worth owning. It may make you think about bugs in a whole different way.

KEMCO's new shooter Phalanx is here, but is it just another shooter?, no way. The diversity of levels, number of scrolls, graphics, color, and music are all done incredibly well. And there are some really cool play aspects. In one level you actually control the speed of your mission as you dip in and out of a huge spaceship five screens long and three screens high! Another high point is the advertising level... if you can get there! Phalanx isn't easy, even on easy, but it's definitely worth the ride (all the way through.) If i had to think of one drawback it would be a little teeny slow-down, but to be honest with you, with that much on screen i welcome a little SD. So if you're looking for an intense shooter, you can't go wrong with Phalanx.

Super 龍双

DOUBLE DRAGON

Finally! an SNES action fighting game that has it all. Two players simultaneous, tons of awesome moves, incredible animation, lots of color, long levels, and no slow down! Someone finally figured it out... Use smaller characters and free up some of that old memory for play-ability and moves... and back-grounds! Some of your moves include roundhouses, spinning kicks, uppercuts, knee slams, throws, rapid punches, behind-the-back kicks (while holding another goon at bay), and my personal favorite... you block

and grab an enemies arm then kick him in the face back and forth... FAST. Once you get the control, this game's a crackup (it's really fun.) In addition to your moves you can pick up the nun chucks or staff and knock a knot on a goons head, all to great double Dragon tunes, done justice by the SNES sound chip. Fighting games don't get much better, so if you're into fighting games and your tired of the old kick and punch (I know I am) Double Dragon is a must-have this October... See-Ya!

Since I'm limited on space (at least till next issue) I'll make a long story short. Lester is working late one night when something goes wrong. You suddenly find yourself in a strange new world. As Lester Knight you must find your way back to mother Earth (with a little help). What I like about Out of This World is it's not your every day action game. Dazzling polygon graphics and a mesmerizing soundtrack keep all of your senses captivated through the entire game. Complete with cinematic displays, mind bending levels, this cart has it all. Unique game play is what makes this cart a keeper. Not only does it give your thumbs a work-out, but you mind as well. You must figure out what steps are necessary to get through each section, sometimes obvious, sometimes obscure. If part two on Mega-CD is half as good, sign me up. From start to finish, this game's a winner.

AVAIL. OCT

To go in-depth on Soul Blazer would take pages and pages (which we will do later), so for now I'll cover the story and overall view of Enix's latest master work. The ruling king has forced the brilliant inventor Leo to build a machine that creates demons. The king then made a deal with these demons to reward them with gold for every soul they can manage to capture. The demons ravaged the earth until it was entirely baron of life.

God's all seeing eye witnesses the entire ordeal from above, prompting him to send Soul Blazer down to save the nations. Soul Blazer must now fight to free the captured souls. Soul Blazer consists of 7 complex levels. All are of the utmost quality in every way and each with a new objective (similar to Actraiser). There is a RPG mode followed by an action mode where you must seal the demon's nests. Items are not bought but acquired by talking to various people and freeing souls. These items play an important role as the player will equip weapons according to geographical conditions. For instance, Gold Armor must be worn to cross the fire dungeon, and Psycho Sword will light your way through the darkest dungeons. All this makes for what could be the Action/RPG of '92! Don't miss Soul Blazer.

Here's one that hasn't made it over here yet for some reason. So, if you're in the middle of a dry spell, you might want to check it out. As part two in the SD series unfolds there is a malfunction in the environmental control system causing the special powers of the SD nation to vanish, thus opening the door for rebel nations to take over. The SD's

only hope is to find four Gachapon Capsules which are spread throughout the galaxy. These capsules store the energy needed to restore order to the SD colony. Four courageous fighters stand up for the mission, Ultraman, Gundam F-91, Rider Rx, and Fire Roa, but they don't know about the other side. Far from Earth, Dark Brain Master of Demons, has

also been searching for the capsules. Last Fighter Twin play similar to your Final Fight style action games, only much better. You can change to any of the four characters at any time, each with their own special technique and more. Each fighter can run, jump, punch, kick, throw, pick up, and slide. In addition, you have a magic bar at the top of the

screen that (depending how full it is) will release each player's special magic, some of which are totally spectacular. The graphics, both in the characters and the backgrounds, are of the highest quality for the SF. The game itself is challenging and fun to play. When you're fighting on decks in deep space they begin to break behind you, forcing you to fight your best, throwing enemies into space before the floor goes out from under you. Other levels have multiple paths, sand traps, caverns, and thunder storms waiting for you, all with great music and intermissions. Another strong point are the enemies, which are always new and different in each level, separating Last Fighter Twin from your standard punch-a-thon. Since I have the entire collection of SD models and am a fan of the movie series, you may think I'm a little biased, but honestly, Last Fighter Twin holds its own in the fighting game genre. If you get the chance, pick one up and see for yourself. (If you like it there's also SD the Great Battle part 1)

RANMA 1/2

When I first popped in the cartridge and saw the cartoony characters I said, "give me a break! Bring on a real fighting game!" I would soon be eating those words. The first thing that you'll notice about this game is that it doesn't take itself seriously the way Street Fighter 2 does. Sometimes you'll get better at SF2 out of anger, but in Ranma 1/2, you get better out of fun. The graphics are colorful and the sound effects are good. All the music tracks have a kind of oriental theme, but they sound great, and most importantly aren't annoying. One of the best parts of this game is the playability. The control over your character is excellent and you will be doing combos in no time. There are ten different characters and everybody has at least one special move. All the moves are easy to control, making Ranma my second favorite fighting game.

PREVIEW

Here's just some of the incredible new games you can expect to see this year on your Super NES. With games like this, I'll probably never leave my house again, except to go out and get them. We'll be covering more on these great games next issue.

F1 Roc hasn't shown up here yet and part two is already scheduled for a Nov. release in Japan ... What gives?

Fatal Fury comes to your Super NES this fall! With all the splendor of the Neo Geo Version this 12 meg version loses little in the translation.

The new Super Battletoads looks like a contender for game of the year. We'll keep you posted. On this great new game.

Fist of the North Star finally gets a fighting version in part 6! Look for an import release this November.

Due out this November, Cybernator looks like it will be another Konami masterpiece. Arcade quality all the way!

Sure to be the best Batman yet, Konami's Batman Returns looks fantastic. More Konami quality due out this fall.

Ranma 1/2 pt. 2 is on the way in Japan, complete with bigger characters, more scrolls and all new moves.

Look for a full review of Roger Clemens Baseball in our next issue by Talko.

TURBO TOONS

Look for this section to get thicker and thicker, and better and better as TTI breathes new life into the Turbo Grafx with some great cards imported from Japan, some great new original efforts and the new CD ROM upgrade. Here's just the beginning of what could turn out to be a great future for Turbo players everywhere. If you see any imports in this section that you'd like to see here in the U.S., be sure to let us know, and we'll get the message to TTI. These guys are ready to go with the new Turbo Duo!

Shape Shifter

TTI
ACTION/ADV.
SCD
AVAIL. OCT.

As the Shape Shifter you must defend Kreillon from evil devastation, of course no mere mortal would stand a chance, but as the Shape Shifter you can change your form. You'll go from an axe warrior to a black panther and even a shark as you battle level after level, pausing only to upgrade your weapons, talk to elders and sorcerers, and to heal your wounds in town. The shops and various rooms in Shape Shifter all use real voice to greet you and help you (or maybe not) with your purchase or decision. This is done very well on the Duo with it's new upgrade. You no longer sit through long access times waiting to hear the voices. The music in Shape Shifter is also excellent. As far as the game goes, you've basically got your standard side scroll action (similar to Legendary Axe) with some Shadow of the Beast scrolls put in for effect. Where things kind of fall apart for me is in the control, especially the panther. When jumping platforms

that only he can make, he would suddenly jump backwards and off the screen. Another of the annoying 'features' are the flies in the cave. It's a nice level with multiple floating platforms and good enemies until these annoying (and hard to hit) little bugs start diving into your head. You can destroy their hives but then more just seem to appear from nowhere. These plague you throughout the level thus killing the fun in that level. It's not that Shape Shifter is a bad game, it's got a lot of good points and it's an original idea. It's just not up to the Legendary Axe/Bonk quality that I would expect from a Super CD game. It does, however, give Duo owners the hope that

games of that quality can (and most likely will) come out with added length, music, and special effects. In the meantime, Shape Shifter is a worthy adventure that's worth a look.

DEAD MOON

AVAIL. OCT.

Turbo Grafx owners are in for a big surprise with Dead Moon, the new (for us anyway) shooter from Natsume. After diverting a comet from certain collision with Earth, forcing it to hit the Moon, probes are sent out to survey the damage. When they arrive there is no trace of the comet. Instead they find a strange alien military presence... this is the setting for Dead Moon. The first thing you notice when you begin play are the numerous scrolls once thought impossible on the

TG-16. The use of color and music is also excellent. Another great feature is when you're fighting a boss and he goes left, your ship (by moving right) will rotate to shoot in his direction, a welcome addition to shooter control. All the levels in Dead Moon are impressive with lots of diversity, various upgradeable power-up, great colors, new enemies, and various scrolling backgrounds making Dead Moon one of the Turbo's all time best shooters!

Your quest takes you through a vast field and into an underground dungeon. Neutopia II is a classic Action/RPG that keeps with the tried and true Zelda type game play. The quest was long and held my interest all the way through and the music is some of the best I've heard on the Turbo.

So, if you've got a little time on your hands, Neutopia II will keep you busy until the next hot Turbo title.

Talk about an awesome shooter, Gate of Thunder has it all! For starters the music explodes with some truly top-notch rockin' tunes. And, because of the increased capabilities of the Turbo Duo, you now get the luxury of sampled sound effects instead of the usual dinky 8-bit explosions you are used to hearing. This game doesn't stop here either, Gate of Thunder definitely has some of the best graphics seen yet on the CD rom. Each level is filled with loads of parallax scrolling and dozens of attacking enemies who look like they're straight out of the Thunderforce series.

With seven levels of intense shooting action this game is definitely worth the price, especially since it's included with the Turbo Duo system. For those of you who already own a Turbo CD, Gate of Thunder can be purchased separately, and as a bonus, includes the new Super System Card

TTI has a lot in store for both their existing Turbo Grafx customers and future Turbo Duo owners. Here are just some of the few great games to look forward to. The long awaited Cyber Bonk flies into your Turbo Grafx in October. This colorful Bonk shooter is sure to be a big hit. In Ghost Manor you'll adventure through a ghostly labyrinth (available October), and coming early '93, get ready for two sure fire Turbo Duo winners, Riot City and the long awaited sequel ... Dungeon Explorer 2. Look for expanded coverage on all the hot new Turbo games in our next issue.

The Neo Geo is enjoying a great year. Games like Fatal Fury and Baseball Stars 2 have got Geo players thirsting for more. With a roll-playing, driving, and strong action platform format, the Geo could vault even further in the vast home entertainment market. Let's hope SNK hears our plea!

Street Fighter fans rejoice! World Heroes, the new 8 meg one-on-one fighting game is smashing its way to your Neo-Geo system this fall. It looks like SNK is determined to release a better fighting game and they've come awfully close. This game is definitely worth the heavy price tag as you will play over and over again trying to pummel your friends into the ground! The control is great with tons of special moves for each of the eight characters. And with two modes of combat (normal and death match) I doubt this game will gather much dust. AVAIL. NOW

I've been waiting a long time for a NEO-GEO action game that uses this viewpoint. Although I would prefer it to be a long, high meg Zelda style action/RPG, this is OK for now. At least it's not another standard kick & punch. However, being that the characters are pretty small, I feel that the game could have and should have been about twice as long. Especially since what is here is so **AWESOME**.

The animation and scaling of each character is incredible as are their magic abilities. The landscape is detailed and colorful, and as usual, the control and sound are perfect. But hey, it's 50 Meg so I expect all of that. Ninja Commandos is just another in the long line of quality arcade carts from SNK. It's after all an arcade game, graphically and musically brilliant ... but just too short.

BASEBALL STARS

NO ONE SAYS ANYTHING
ABOUT MY MOTHER!

In the short history of video games, baseball games have been for the most part, disappointing. Some looked good, some played well, and some offered simulations with meaningful statistics and the ability to play an entire season. But, no baseball video game to this point has put it all together to achieve the near perfect blend of playability, simulation, and graphic realism until now.

Baseball Stars 2, although lacking the ability to play an entire 162 game season while keeping track of statistics (a feature that we hope game companies will consider mandatory in the next wave of baseball games), is as close to experiencing real baseball as there has ever been away from the ballpark.

The graphics, as we have come to expect from SNK and the Neo-Geo, are fantastic. The hitters are about 3/4 of the size of the screen and the animation of the players in both the picture/batter view and the 3/4 view is very realistic. In addition, Baseball Stars 2 offers graphic excellence such as, full screen close-ups at every base, close-ups for diving and leaping catches, and

fight after the batter has been hit by a pitch, and my personal favorite, the "camera" following the action from a behind the batter viewpoint to scale toward the infielders instead of going straight to the 3/4 view. My only complaint is that it doesn't stay that way the entire time, scaling back and following the ball all the way to the bleachers. Oh well, Baseball Stars 3 maybe?

The game play in Baseball Stars 2 is also top-notch. Control over the player's movements is fluid and you do not have the problems that have plagued other baseball games like fielders running to the wrong bases or being positioned incorrectly in the outfield. The control response is crisp and immediate allowing you to have full control over jumping, diving, pick-offs, etc. In short, Neo-Geo owners can not do better than Baseball Stars 2. It simply has the best graphics, sound, and game play this side of ESPN.

OTHER STUFF

A lot of the good news from Japan these days seems to revolve around Sega, having enjoyed a major surge in the marketplace due to the success of Lunar (MCD) and Shining Force, and anticipation of Sonic 2, Thunderstorm FX, Nobunaga and His Ninja Force, Land Stalker, and 3x3 Eyes just to name a few. Some good news for us is that Konami is rumored to be working on a Mega Drive version of Aliens in addition to their American announcement of Turtles, The Hyperstone Heist, and Sunset Riders for the Genesis. CD games in the planning stages in Japan include Lunar 2 by Game Arts, Thunderforce V by Tecno Soft, El Viento 2, Devastator, Time Gal, and Star Blade by Wolfteam, Golden Axe 3 from Sega, and Shining Force 3 by Climax. Add this to an already strong line-up and you've got a major comeback. Meanwhile, here in the U.S., Sega of America is getting set for the release of the Sega-CD. Unlike the import release, SOA's got so heavy hitters right out of the gate like Batman Returns, in which the driving scenes scale smoothly with awesome speed and detail, and Yuzo Koshiro doing the music! And, Virgin is hard at work on the new Terminator CD which is not only longer, but uses filmed actors as the characters in a side scroll action format. Terminator also has 12 minutes of incredible full motion video, and the music will be right out of the movie! Look for Out of This World 1 & 2 (on one CD) from Virgin early next year as well! JVC is ready with three hot titles for the Sega-CD, Wonderdog, Wolfchild, and Dungeon Master Skull Keep. Sony is set to go with Sewer Shark, a futuristic, first person shooter that will knock your socks off. Get ready for some scaling! Renovation is bringing over Thunderstorm FX as Cobra Command, Bignet has got Black Hole Assault and Third World War, and Acclaim is rumored to have Mortal Combat, Spiderman, and Total Carnage in the works! Tengen, Sierra, and Spectrum Holobyte also have titles on the way. All this makes for a great debut of the Sega CD. While we're on the subject of CD's, unfortunately the much talked about Nintendo CD is rumored to have been put on hold until as late as early '94 (with cartridges looking as good as they do, we should be able to hold out for as long as it takes). My guess is Nintendo is working on something incredible for their CD debut. Good news for SNES owners is that the third party companies are starting to use the new DSP. This new chip makes true 3-D polygons easier to program and adds more depth and detail to the graphics. The new chip also speeds up the CPU considerably from 2.5 mhz to 7-10 mhz. Games using this new chip should show up soon, we'll keep you posted. In other Nintendo news, we recently attended the Nintendo show in Japan and got a peek at a nearly completed Battletoads, it looked incredible! Other new games at the show included Capcom's Breath of Fire, Konami's Batman Returns, and Taito's Sonic Blastman. Look for a full report on the show in our next issue. NEC Avenue has been working on their virtual reality sound system, which will premier on the all new Super Darius Super CD this December. This new system (similar to Wolfteam's Thunderstorm FX) allows the user total surround sound when wearing headphones, the effect is incredible. And, last but not least, Konami has completed its new Hyper Beam wireless controller for the Super Famicom. It debuts in Japan September 25th for about \$55.00 U.S. In other Sega news, there's a four player tap in the works for the Mega Drive version of Gauntlet. Could this mean four player Sega Games? Let's hope it shows up over here. And that's what's happening... in other stuff!

INTERNATIONAL ARCADE STUFF

Yet another fighting game has hit the arcades in Japan, Brandia.

Here's the girl that got the part of Chun Li in Japan's SF2 commercial. What do you think?

In other SF2 news ... In Japan, they are currently working on a full length animated SF2 movie. Let's hope it comes out over here.

Also hot at Japanese arcades is Suzuki 8 Hours

Even though these screens are very early, you can see that the Mega CD version of Final Fight will come very close to the arcade original. This two player version will be out around December in Japan.

Here's an early shot of Batman for the Sega CD

Golden Axe 3 has been announced for the Mega CD. For now, all we have are these great arcade screens. If the CD version even comes close, it should be awesome. 53

THE GRAVEYARD

THE GRAVEYARD IS WHERE WE EXHUME OLD GAMES, GAMES THAT KIND OF SLIPPED BY UN-NOTICED. MAYBE IT WAS RELEASED AT THE SAME TIME AS A MONSTER GAME HIT THE SHELVES, OR MAYBE YOU JUST BOUGHT YOUR SYSTEM AND IT'S NOT AROUND ANYMORE. EITHER WAY... SOONER OR LATER... YOU'LL SEE IT IN THE GRAVEYARD....

HERE'S A SHOOTER THAT GOT A BAD RAP BY JUST ABOUT EVERYONE WHO REVIEWED IT, BECAUSE OF A LITTLE SLOW DOWN (WHICH IS SPORADIC AND DOES NOT INTERFERE WITH THE QUALITY OF THE GAME). EDF COMBINES A UNIQUE BLEND OF MUSIC WITH SOME INCREDIBLE SHOOTING ACTION. AS YOU FLY THROUGH COLOR CHANGING SUNSETS, MULTIPLE SCALING BACKGROUNDS, AND FIERCE MECHANIZED BOSSES. ADD TO THAT ENDLESS LAYERS OF SCROLLS AND TONS OF WEAPON UP GRADES, AND YOU'VE GOT A GREAT SHOOTER!

GRANADA IS AN EARLY WOLFTEAM GAME THAT SLIPPED BY FOR SOME REASON. IF YOU'RE INTO SHOOTERS AND YOU MISSED... GO FIND ONE! THIS WAS THE FIRST GAME THAT USED SCALING ON THE GENESIS (AND IT'S SMOOTH. SEE PHOTO BELOW). GRANADA

Granada

TAKES YOU ON AN ALL OUT GROUND ASSAULT. COMPLETE WITH MULTI SCROLLS, GREAT BOSSES AND EXPLOSIONS, AND GREAT WOLFTEAM MUSIC... I HIGHLY RECOMMEND GRANADA.
